November 1, 2022

CPUD Water Customer

On **Thursday, November 10, 2022**, District staff and District Contractors are scheduled to make improvements to the water transmission system by installing and cutting in a 24" main line downstream of the District's Clearwell at the Jeff Davis Water Treatment Plant. We anticipate turning the water off at approximately 8:00 AM and turning it back on around 4:00 PM or as quickly as possible.

Customers affected are:

- Customers that are below the Jeff Davis WTP, Located at 1601 West Forty Rd. Rail Road Flat.
- Customers that are situated in the Glencoe service area, including Independence Rd and Blue Ridge Rd.
- Customers along Hwy 26, between Ridge Road and Sky High Drive. This includes Stormy Lane and all Customers on Sky High Drive.

Therefore, as a precaution, we advise that all water used for drinking, cooking, making ice, brushing teeth, or washing dishes be boiled. A rolling boil of one minute is sufficient. As an alternative, bottled water may be used. Water from the tap is suitable for bathing, washing clothes, and irrigation.

We will take all precautions to ensure that no contaminants enter the line during this improvement. When completed, **in accordance with regulatory requirements**, the District will thoroughly flush the line and **collect bacteriological samples on two consecutive days**.

This "**Precautionary Boil Water Notice**" will remain in effect until the scheduled bacteriological survey shows that the water is safe to drink. This process generally takes **26-48 hours after collecting the second day's samples**. Once those results are received, the District will issue a follow-up notification lifting this Precautionary Boil Water Notice.

Sincerely,

A handwritten signature in blue ink, appearing to read "Travis Small".

Travis Small, General Manager

**Mission Statement**

*Calaveras Public Utility District (CPUD) is dedicated to providing an environmentally sustainable, reliable & cost-effective drinking water supply. As good stewards, our local water resources shall be maintained for public benefit implementing sound policies and practices ensuring inclusiveness with openness in all matters of the District.*
